『Access Point』

Second edition of Trivandrum's First ever Inter-school Hackathon.

Hosted by The School Of The Good Shepherd's Hack Club TVM

GCOD
SHEPHERD

[[Theme]]

What if the barrier standing between someone and their independence was something you could actually go solve? That's what Access Point challenges students to do: create real technology that closes everyday gaps in accessibility for people who are blind, deaf, neurodivergent, living with chronic illness or navigating age related decline.

PHASE I - THE HACKATHON

A 7 hour sprint where teams design, and build a solution to any one of the problem statements presented to them. Background material and research resources will be released in advance, in the form of The Hackbook, so the teams can come in prepared.

DEVELOPMENT PHASE

The top 5 teams from Phase I will receive a ₹10,000 development grant and three weeks to refine their prototypes and prepare their final pitch.

PHASE II - DEMO DAY

The top 5 teams will present their finished products to a panel of industry judges. The top 3 teams will be offered internship opportunities with partnership companies along with cash prizes.

[[Timeline]]

Registrations	September 1 - 16
Orientation Session	September 20
Screening	September 21 - 27
HackBook Release	October 3
